

ADVANTAGES

- Can be used as hydrophobic or a coalescing air filter
- Optional external clips
- Non-discharging, high efficiency media
- Pre-filter with long life and a low and stable pressure drop
- Lightweight and easy to install

| | |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application | Suitable for most areas including wet and coastal Pre-filter for gas turbines, large industrial air compressors, diesel & gas engines, generators & enclosures, wind turbines |
| Frame | ABS |
| Gasket | Polyurethane;Neoprene |
| Media | Glass fiber;Synthetic |
| Sealant | Polyurethane |
| Rec. final pressure drop | 450 Pa |
| Relative Humidity max | 100% |
| Installation Options | Separate bank, close-coupled with external metal clip |
| Comment | Additional product features: High mechanical strength Optimal coalescing performance High strength plastic frame Downstream media support Can be fitted directly to a final filter with external clips |
